DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1, 5, 15-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (US patent no 6,079,908). Anderson discloses a corner block (figure 11-13 embodiment) having parallel end surfaces (112, 114, figure 11), parallel side surfaces (116, 118, figure 11), parallel top and bottom surfaces (170, 122, figure 12) wherein the top surfaces has a channel (131) (closer to one side surface wherein the blocks are used to form corner wall (figure 1) wherein the channel is for receiving a retaining member (rods) where no portion is exposed above top surface of block wherein one of the side surface and end surface has a texture surface being of greater texturing degree than the top surface.

Claims 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Legault (US patent no. 5,123,221). Legault discloses a first plurality of concrete blocks (27) defining exterior corner and second plurality of blocks (25, 59, figure 3) arranged side-by-side and atop one another defining a wall portion adjacent the exterior corner wherein the height of the first plurality of blocks (blocks 27) is less than the height of the second plurality of blocks (blocks 59) wherein the exterior corner is formed of first and second subcourses of blocks (figure 3).

Claim Rejections - 35 USC § 103

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (US patent no 6,079,908). Anderson disclosed all the claimed features of applicant's invention. However, figures 11-13 embodiment does not show front and rear walls of channel diverge upward from bottom. Anderson in his embodiment shown in figures 5-7 shows the channel (70) for another block with walls diverge upward from bottom (70, 72, figure 6). It would have been obvious to one of ordinary skill in the art to have modify the corner block of Anderson such that the channel walls diverge upward as taught by Anderson himself for easy insertion of parts.

Allowable Subject Matter

Claims 3 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-12, 14, and 19 are allowed.

Response to Arguments

Applicant's arguments with respect to all pending claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3632

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
